

# Singapore Electricity Roundtable 2025

---

29 August 2025  
The Singapore Edition Hotel

### Singapore Electricity Roundtable 2025

Join us for this year's Singapore Electricity Roundtable to gain insights into the electricity industry, learn about the issues and challenges facing the energy and electricity sectors, and network with key experts and decision makers.

#### Our distinguished speakers include:

Tan Boon Gin, Chairman, Energy Market Company (EMC)

Puah Kok Keong, Chief Executive, Energy Market Authority (EMA)

Vickrem Vijayan, Chief Operating Officer, Singapore, Sembcorp Industries

Rainer Korte, Commissioner, Australian Energy Market Commission (AEMC)

Dr David Broadstock, Senior Research Fellow and Energy Transition Research Lead (NUS)

Edouard Lavillonniere, Managing Director, EDF Lab Asia Pacific

Ong Lay Hwa, Head of Energy Transition, Shell

#### Roundtable Registration

You can register online for the Roundtable at [www.home.emcsg.com/roundtable](http://www.home.emcsg.com/roundtable) or complete the hardcopy registration form and return it to Energy Market Company (EMC).

#### About Singapore Electricity Roundtable

EMC's Singapore Electricity Roundtable is a leading energy forum for industry leaders to discuss issues and challenges facing the electricity and energy sectors globally.

The Roundtable brings together influencers, decision makers, potential investors and experts in the electricity and related industries from around the world. Delegates include government officials, company presidents, CEOs, managing directors and other key figures from organisations in these industries, such as regulators, market participants of the National Electricity Market of Singapore (NEMS), financial institutions and consultancies. In 2023 when the event was last held, close to 200 participants attended the event.

#### About the NEMS

The NEMS is Asia's first liberalised electricity market. It is an integral part of Singapore's overall energy policy framework which seeks to maintain a balance of the three policy objectives of economic competitiveness, energy security and environmental sustainability. Since it began operating on 1 January 2003, the NEMS has established itself as stable, transparent, competitive and efficient.

The NEMS promotes economic efficiency through competition, and has continued to attract new participants to the market while encouraging the shift to more efficient electricity generation. Through its commitment to market fundamentals, the Singapore model has received international recognition.

#### About EMC

EMC is a subsidiary of the SGX Group and the independent operator of the NEMS' wholesale market.

EMC is committed to the sharing of knowledge and expertise to promote competitive electricity markets around the world. We regularly host delegations from other countries who are interested in learning about the NEMS as well as Singapore's liberalisation journey. We also offer customised training programmes that combine engineering, economics and regulatory expertise and perspectives, for organisations that wish to gain more insights into competitive electricity markets.

In addition, EMC provides consultancy services for clients embarking on the path of market liberalisation. These can range from market review, market design and market systems development, to the design and implementation of market operations procedures and Disaster Recovery processes.

#### Roundtable Cocktail and Dinner

Venue: FYSH, The Singapore Edition Hotel

The cocktail reception and sit-down dinner are open to registered Roundtable attendees only. Advanced registration is required, as seats are limited.

12.00 pm	Registration & Lunch
1.00 pm	<b>Welcome Address: Empowering the Market for the Future – A Collaborative and Sustainable Effort</b> Tan Boon Gin, Chairman, EMC
1.15 pm	<b>Keynote Address: A Strong Market System for the Energy Transition</b> Puah Kok Keong, Chief Executive, Energy Market Authority (EMA)
1.40 pm	<b>A Fine Balance – Transforming Singapore's Electricity Market</b>
2.05 pm	<b>Energy Transition Journey</b> Vickrem Vijayan, Chief Operating Officer, Singapore, Sembcorp Industries
2.30 pm	<b>Navigating the Energy Trilemma – Challenges and Opportunities Transitioning to a Low-Carbon Energy Future</b> Rainer Korte, Commissioner, Australian Energy Market Commission (AEMC)
2.55 pm	<b>Panel: Reimagining Tomorrow's Market Systems</b> Toh Seong Wah, Chief Executive Officer, Energy Market Company Puah Kok Keong, Chief Executive, Energy Market Authority (EMA) Vickrem Vijayan, Head of Energy Commercial, Sembcorp Rainer Korte, Commissioner, Australian Energy Market Commission (AEMC)
3.35 pm	<b>Networking Break</b>
4.05 pm	<b>Rethinking Today's Energy Solutions – Market Evolution and Adaptation</b> Dr David Broadstock, Senior Research Fellow and Energy Transition Research Lead (NUS)
4.30 pm	<b>A Green and Sustainable Future – How Low-Carbon Energy Fuel the Journey to Net Zero</b> Edouard Lavillonniere, Managing Director, EDF Lab Asia Pacific
4.55 pm	<b>Powering the Energy Transition Together</b> Ong Lay Hwa, Head of Energy Transition, Shell
5.20 pm	<b>Closing Remarks: Collaborative Pathways to Net Zero 2050 – Many Solutions, One Goal</b> Toh Seong Wah, Chief Executive Officer, EMC
5.30 pm	End
6.00 pm - 9.00 pm	Cocktail and Dinner

The programme above is accurate as of July 2025. Please note that the topics and speakers are subject to change. For the latest updates, please visit [www.home.emcsg.com/roundtable](http://www.home.emcsg.com/roundtable).

#### Enquiries:

For enquiries regarding the Singapore Electricity Roundtable, please contact Amy Koh at [electricity.roundtable@emcsg.com](mailto:electricity.roundtable@emcsg.com) or call her at +65 6871 1857. Visit [www.home.emcsg.com/roundtable](http://www.home.emcsg.com/roundtable) for more details or to download additional copies of the registration form.
